Pay attention to the jumping capabilities of the animal. It is important that the animals learn to keep their distance from an electrified fence wire.

Fence heights
 do of course have a determining influence on the height of the wires.

Sheep
Dairy cows and calves

and goats

The indicated wire heights are considered to be guidelines for your fence. The size of the animals

Netting height

Pigs

Rabbits and hares

Poultry and cats

## Post distances

So that fence material does not hang too low following post distances are recommended:

Please take care of local conditions

- with wires and twines:
- with tapes:
- with ropes:

6 m to 8 m (depending on particular weight of fence material)
3 m (tapes 40 mm )
5 m (tapes 20mm)
6 m to 8 m (tapes 10 mm )
4 m (rope diameter $7-8 \mathrm{~mm}$ )
6 m (rope diameter $5-6 \mathrm{~mm}$ )
